Swiss citizen
born 1949.09.29
married, one son, 17 years
high school, self-learning, free-lance
to year 2000.

Free-lance software developer and maintainer

From 01.2005

Self-learning free-software, database organization, Mysql, Postgres. PHP programming, CMS tools evaluation, XML, XHTML, CVS, Subversion. Now preparing a small seminar about LINUX and usefull tools at Popular University during next winter. Member of linux-group of state.

From 09.2000

Testing leader in Beaumont hospital in Bienne, switzerland, to install SAP ISH module for patient management, billing, accounting, medical forwarding, connections of foreign systems for radiology, physiotherapy and many diversives. Connections and controlling with mainly FI/CO module, also HR module. Building lots of data extraction to build special and efficient tools in accounting and statistics. Install new billing system TARMED, teaching billing personal, controlling. Determined duration contract ended end 2004.

From 01.1990

Free-lance system leader, in Moutier hospital, switzerland, for whole software and hardware maintenance and developement. Patient management, billing, accounting, HR and many other. An attractive realisation was connection (interface) between Unix and IBM AS-400 system via a converter protocol. It was 100X more faster rather a normal TCP-IP connection, with all recovery tools between the 2 systems and was the first connection of this type in switzerland. Also maintain several systems for HR and accounting. All that in RPG and JCL programming language, self-learned.

From 01.1970

Free-lance for many different customers, mainly in accounting, where i got a very strong experience. IN HR, I developed a standard appllication, wich was used in more than 50 enterprises in switzerland. All that in Cobol, also self-learned. During this period, I was formation leader at Philips software dept. Please, see french CV for more information.

My strongest domains :

Accounting, billing, statistics, controlling. SAP parametrisation in ISH. Experience with HR and FI/CO modules. Very large experience in swiss hospitals organisation. As consultant, i worked better in user's domain rather than external support. Good ability to work in team and great sense to fix important and subsidiary points. Mother tongue is french with good knowledge in german, english and italian
